# PEONIES ••• *New Introductions of 1930*

We are pleased to introduce this year eight new Peonies which, in our estimation, compare favorably with the best of foreign and domestic introductions. Having tested these varieties for the past eight years, we have no hesitancy in claiming for them a high rank in the Peony world. Peony growers who have visited our fields have greatly admired these eight varieties, and already a portion of the limited supply available for fall delivery has been sold. We urge every progressive grower to obtain these new varieties. You will eventually be growing them—why not profit at introduction.

## DR. J. H. NEELEY

In Dr. J. H. Neeley we are introducing a Peony that is now considered one of America's truly fine varieties. We are confident that this variety is destined to be ranked among the five finest. In bud form, the flowers are faint blush pink, upon full opening are pure white. The broad heavy guard petals are of an unusually waxy texture; the center petals are rounded and cup shaped. The stems are long and strong. The fragrance is very pleasing. In Dr. J. H. Neeley we believe perfection has almost been reached. **3-5 eye division, \$50.00.**

## JUDGE SNOOK

A really glorious flower that is destined to be ranked among the world's finest. The flowers are extremely large and are of rose type. It flowers in midseason. The stems are long and strong, supporting enormous flowers of pure snow white, when fully opened. Upon first opening, the flowers are pale creamy flesh, fading to pure snow white. The odor is strong and pleasant. It is our belief that Judge Snook is undoubtedly one of the most magnificent Peonies ever originated. It is robust in growth and reliable in flowering. You will be growing Judge Snook eventually. **3-5 eye division, \$50.00.**

## GOOD'S GEM (Jap.)

Peony experts who have seen this Peony for the past few years have proclaimed it the finest Japanese variety yet introduced. Good's Gem possesses to the ultimate degree those qualities most sought by hybridizers. A veritable giant in size of flower and plant, remarkable substance and striking coloring combine to make Good's Gem a masterpiece. The petals are snow white, the petaloids golden yellow. A very robust grower, dwarf in habit and reliable in flowering. **3-5 eye division, \$50.00.**

## GOOD'S IDEAL

Semi-rose type; midseason. A remarkably beautiful Peony is the consensus of opinion regarding Good's Ideal. The flowers are large and are supported by strong stems. The guard petals are pale flesh and surround a collar of faint Havana brown. In general appearance, the flowers are creamy-white and are very striking. It is naturally a free and reliable bloomer. Good's Ideal is a plant of ideal habit, strong, upright and vigorous, with good stems. It is truly a sensational Peony. **3-5 eye division, \$50.00.**

## DARLING O'MINE

Crown type; midseason. Commercial growers of Peonies remarkably select this variety as the peak of perfection for cut flower plantings. Darling O'Mine possesses the essential factors required by critical growers—appealing color, good long stem and wonderful keeping quality. In general description, Darling O'Mine may be adequately described as an improved President Taft. The strong stiff stems support extremely large flowers of beautiful rose pink, blending to delicate lavender pink in the center. We believe this variety is destined to be one of the most popular ever introduced in America. For cutting it is ideal; for landscaping, it is superb; and for general usefulness, it is unsurpassed. **3-5 eye division \$50.00.**

## ANNE NIELSEN

Crown type; late. For delicate beauty and charm, Anne Nielsen is without an equal. It possesses the aesthetic refinement attained in such beautiful varieties as Venus and Mme. Emile Galle. The guard petals are very broad and pure snow white in color. The secondary petals are slightly smaller than the guards, and are delicately margined shell pink. Anne Nielsen has a pleasing rose fragrance. A truly remarkable Peony is the consensus of opinion regarding Anne Nielsen. **3-5 eye division, \$50.00.**

## MRS. J. H. PERKINS

A crown type flower of large size that flowers in midseason. The broad, shell-shaped guards of pearly white enclose a zone of creamy white interspersed with pale yellow petaloids. The broad center petals are pale flesh white. The stems are long and strong. The fragrance is strong and pleasing. In total effect, Mrs. J. H. Perkins is a magnificent "triple-decker," a Peony greatly admired by those acquainted with it. **3-5 eye division, \$35.00.**

## SWAN WHITE (Single).

A beautiful dwarf single Peony that is among the first to flower. For landscaping we believe Swan White is unsurpassed by any single variety with which we are acquainted. A double row of wide snow-white petals surround a disc of golden-yellow stamens. The flowers are supported by stiff stems. Swan White remains in flower in better shape and for a longer time than any other single. A row of this variety on the lawn is a beautiful display. **3-5 eye division, \$10.00.**

## *Introductions of 1929*

### MRS. JOHN M. GOOD

(Good & Reese, 1929.)

Experienced growers who have seen this beautiful variety have greatly admired its beauty and charm. A wonderful white peony of largest size, often averaging nine inches in diameter. The flowers are flat, many petalled and perfect in form. The large buds are conical in shape, and upon opening are purest snow white, showing no stamens and without markings of any kind on entire flower. Three to four flowers are carried on each strong, stout stem, thus giving the plant a very balanced and pleasing appearance. Mrs. John M. Good is a peony of great beauty; it is undoubtedly one of the world's finest. Midseason. **3-5 eye division, \$35.00 each.**

### FRANK E. GOOD

(Good & Reese, 1929.)

We confidently believe Frank E. Good is destined to become one of America's truly fine peonies. It possesses an almost unknown color shade that is distinctly different and rare. Those who admire the "Havana Brown" shade in such favorites as Solange and Tourangelle invariably go into ecstasy over this beautiful new variety. The long, strong, stems support large, perfectly formed flowers of pale flesh pink, the center of the flower being overlaid with delicate brownish salmon. In general effect the color is intermediate between Solange and Mme. Emile Galle. A pleasing fragrance, combined with vigorous growth, makes Frank E. Good one of the most beautiful and charming Peonies we have ever seen. Rose type, late. **3-5 eye division, \$35.00 each.**

*Introduction of* **JOHN M. GOOD** (Rating 9.3) Rose type, midseason. Very large, handsome flowers of pure glistening white without spot or blemish; the petals are symmetrically arranged and graduated toward the center. In early stages the outer petals are faintly flushed and the center shows a golden glow, when fully open the flower is pure snowy white. Richly fragrant. Plant is erect and strong. A very choice and scarce variety. **3-5 eye division, \$12.50 each.** The lowest price at which this variety has ever been offered.

# Plant Peonies

FOR over a quarter of a century we have specialized in the production of Peonies, the most popular of the hardy perennials. Previous to the embargo we imported each year large quantities of practically every variety offered by European originators and growers. At the present time G. & R. peony plantings cover eighty acres in our nurseries—the largest plantings of their kind in the world devoted exclusively to root production.

## OUR GUARANTY

We guarantee our Peonies true to name.

Should error occur, we will replace with true stock or refund amount paid. There is one fact about Peonies that should be brought forcibly to the attention of all purchasers of Peony roots. That is, it takes fully three years from the time the root is planted before the Peony becomes adequately established to enable it to produce normal flowers. We do not pretend to come to final conclusions regarding them until they have bloomed the third year from planting.

### Peonies to Bloom for Decoration Day

We are often asked for a list of varieties that will bloom for the 30th of May. In the latitude of Springfield, Ohio, the following are usually blooming at that date: **Edulis Superba**, **Madame Calot**, **Festiva Maxima** and **Monsieur Jules Elie**. For points located about 39th parallel all varieties marked Early Mid-season and Mid-season will bloom for Memorial Day.

### Size of Roots

**Divided Roots**—This is a root divided until it has from three to five eyes. This is the size we always plant and recommend for general planting, both as to the desirability of its low cost and the results obtained.

### Time of Delivery

The varieties in this list are offered for Fall 1930 and Spring 1931 delivery—commencing September 15th. In completing our new Peony Storage which will hold roots in complete dormant condition until May 1st, we are enabled to offer this list of varieties for Spring 1931 delivery. Orders must reach us by November 10th, so that we may place the roots in storage for Spring shipment whenever customer desires. Early orders will, we believe, prove mutually advantageous.

## (Double Flowering)

The figures before the varieties give the ratings based on 100 per cent and were established by popular vote of the members of the American Peony Society. These ratings assist greatly in the selection of the most meritorious varieties. Those without ratings are new and have never been rated. A large portion of the standard commercial varieties do not enjoy high ratings. For this reason, we advise our customers who intend to make commercial plantings to get in touch with us before final selection of varieties is made. We believe we can be of assistance in this connection.

8.6	<b>EUGENIE VERDIER</b> —(Calot, 1864.) Semi-rose type; midseason. Do not confound the name of this variety and Eugene Verdier. It is a strong, healthy grower, with bloom on three to four foot stems. The flower is enormously large; its loose petalage adds a distinctive charm never seen in the varieties crowded with petals. Its form is ideal, being flat showing its great wealth of tints and blending of coloring to fine advantage. It opens a fresh delicate Hydrangea-pink with primary petals lighter, center flushed crimson.		3.25	25.00	200.00

9.1	<b>FRANCES E. WILLARD</b> —(Brand, 1907.) A perfectly formed flower. Petals of varying sizes form a very large rounded flower often having a raised cup-shaped center enclosing golden stamens. Opens an exquisite bluish white with an occasional carmine touch, changing on the lawn to a pure white. As a cut flower it remains a pinkish cream. A royal flower.		3.25	\$25.00	
8.2	<b>GIGANTEA</b> —(Calot, 1860.) Rose type; early midseason. Gigantea describes the size of the flowers so well. The flowers are enormous size. Gigantea flowers 7 to 8 inches across, occasionally it throws a startling flower 10 to 12 inches in diameter on long stems. If it has a fault it is that the stems in some instances do not support the enormous flowers. Color the most exquisite shade of bright pink or lilac-rose tipped with silvery-white, reflecting a silvery sheen; has an agreeably spicy fragrance. Quite distinct, fully as effective for decorative purposes as the largest and showiest Chrysanthemum. Has true June Rose fragrance.		5.00	40.00

7.9	<b>HELEN WOLAVER</b> —(Brand) Color a sea-shell pink shaded with deeper pink or old rose color. A very unique flower. Blooms do not open fully but the outer petals draw away the center in the shape of a rose-bud of deep rose color. The guard petals are very prominent and stiff and give the flower the appearance of being made from wax. It is highly rose scented and a very late bloomer. It does not reach perfection until the plants are four years old but the results are worth waiting for. We do not advise this variety for Peony beginners although a very distinct novelty. Desirable in any Peony garden.	1.00	10.00		
	<b>HENRI CORE</b> —(Doriat, 1925.) A beautiful new flesh-pink Peony from France. The flowers are very full. Late.	7.00	70.00

9.1	<b>LADY ALEXANDRA DUFF</b> —(Kelway, 1902.) Lovely French-white—that is to say, not a snow-white, although when fully opened it is quite white; in the young stage tinted with a very fresh, delicate pale shade of what is commonly called "blush" or palest pink. The central flower is a double flower of rather flattened circular form, and the central petals have a very small touch of carmine. The side flowers (which are freely produced and which open after the central flower), come in semi-double saucer-shaped form, exposing the anthers. 9.0	<b>LA FRANCE</b> —(Lemoine, 1901.) Rose type; late midseason. It stands preeminently in a class by itself. It bears enormously large, full, rather flat, perfectly double flowers that are deliciously fragrant. Color La France pink as the flower ages, finishing soft apple blossom pink reflecting mauve. # FERNS

Altho we have been increasing our production of Nephrolepis Ferns for the past four years, the demand constantly exceeds the supply. Successful fern growing invariably hinges on the cleanliness of the plants. Ours are free from "White Scale." We carry at all times a good supply of 2¼ inch ferns.

**TEDDY JUNIOR** (The Fern for Every Household)—The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy Junior" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot.

**JOHN WANAMAKER** ("The Wanamaker Boston Fern")—A "sport" from Nephrolepis Scholzei, with longer, narrower, gracefully drooping fronds. It is not so compact in growth as Scholzei, and, therefore, does not decay in the center, and is a durable house Fern. It is a rapid grower; making an abundance of fronds, and is quite distinct from any other Nephrolepis.

**ROOSEVELT**—The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. Our sales of Roosevelt have exceeded two hundred and fifty thousand plants.

**WHITMANII** (The Ostrich Plume Fern)—The well-known fluffy leaved fern; a popular florists' variety.

**WHITMANII COMPACTA** ("The Parlor Fern")—This is a condensed form of the "Ostrich Plume" Fern, with valuable characteristics added which are not evident in the parent—the pinnae subdividing, making miniature fronds which are super-imposed on the main fronds, looking as if two or more were condensed in one. Graceful beyond description.

**SCHOLZEI** ("The Crested Fern")—The fronds, like Scottii, stand erect, and with a graceful arch form a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimens from becoming defective or yellow.

**BOSTONIENSIS** ("The Boston Fern")—A variety that needs no description. Still the most popular of all varieties.

**DWARF BOSTON**—The most popular of present day ferns. A dwarf type of the popular Boston variety.

**GOODI** ("The Baby's Breath Fern.")—(Good & Reese.) This Fern is splendid to use for fern dish planting. The finest foliage of all the ferns. Fronds very fluffy. A well-grown specimen is in great demand. It is of easy culture.

**SCOTTII** ("The Newport Fern.")—It is a rapid grower and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite.

## New Geranium

### "Michell's Sensation"

(A cross between Ricard and Jean Viaud.) Well

named, as it is really a "Sensation," and surpasses all red varieties now in existence. As a pot plant for Easter Sales or Mother's Day, or as a bedding plant it has no equal in brilliancy of color, free-flowering and habit of plant. Below are a few of the outstanding features of this sterling novelty.

A—Very vigorous grower.

B—Free-flowering qualities, not known in any other variety.

C—Handsome foliage of leathery substance. Light green with dark zone.

D—Brilliant red, Poinsettia colored. Double flower heads, expanding 5 to 6" across.

Orders booked now for delivery beginning Nov. 1st 1930. Offered in 2 1/4" stock only. Price per dozen, \$3.25; per 100, \$25.00; per 1000, \$225.00.

**Irvington Beauty (New):** Since introducing this beautiful new Geranium in 1927, the demand has constantly exceeded the supply. It is the most prolific of all Geraniums, flowering earlier and later than all other varieties. Of branching habit, every branch producing an immense truss of rosy salmon pink flowers. It is not unusual for a four-inch pot plant of Irvington Beauty to show five to seven flower heads at one time. Every progressive florist should grow Irvington Beauty for increased profits. 2 1/4 inch pots, \$1.35 per 12, \$10.00 per 100, \$90.00 per 1000.

**Fiat—(The True Variety):** No Geranium has ever been so favorably received as Fiat. Since introduction, it has been in greater demand than any other variety. For that reason, some growers have sent out Landry, Improved Poitevine and others under Fiat label. We have the true stock of Fiat, and will have the largest supply in the country this year. Florists who are not growing Fiat are missing the most brilliantly colored of all Geraniums. Of good growth, and an intense dark salmon pink in color. Bigger profits are being made in growing Fiat than with any other Geranium. 2 1/4 inch pots, \$1.35 per 12, \$10.00 per 100, \$90.00 per 1000.

## Double Flowering Varieties, 2 1/4 inch Pots

Price, except as noted, 85 cents per 12, \$6.00 per 100, \$55.00 per 1000.

**American Beauty:** Of the same color as the famous American Beauty Rose. A very free bloomer, and excellent for forcing.

**Beaute Poitevine:** For many years Poitevine has ranked as the leading pink Geranium. In color, beautiful shrimp pink. One of the best for pot work.

**Comtesse De Harcourt:** One of the two best white Geraniums. The large trusses of pure white flowers hold the color in excellent shape.

**Helen Michell:** The universal favorite where planted. Helen Michell cannot be surpassed in either pot work or outside planting. Enormous trusses bear brilliant scarlet flowers that do not fade in the sun.

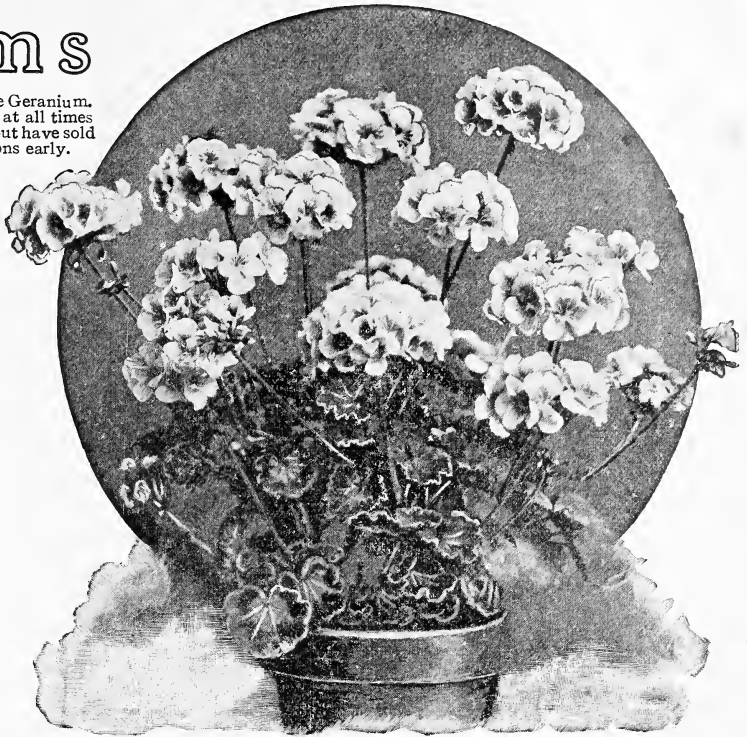

**Jean Viaud:** One of the older favorites that is still used by many growers. The color is rich deep pink, shading to light pink near the base of the petals; the base of the upper petals being creamy white. Jean Viaud is a remarkably good Geranium.

**La Favorite:** In this Geranium we have the finest double white in cultivation. The flowers are borne in large trusses of the purest snow white, retaining this pure whiteness even in the height of summer. For winter blooming La Favorite is excellent. Your profits will increase by using this favorite.

**Madame Barney:** A very profuse bloomer, the individual florets being of very large size. The color is pure deep pink. Considered the perfect bedding Geranium.

**Madame Landry:** The salmon pink Geraniums have been in constant demand for the past five years. We have never been able to grow enough of Madame Landry to supply the demand. The color is dazzling salmon pink with a slight scarlet shading. The flower heads are large and carried on long stems.

**Lucy Becker:** This grand novelty is a sport of Easter Greeting, and is like it in everything but color which is a rosy-pink.

**Prince:** Immensely large flowers, strongly crimped of fine shade with from six to ten petals; color rich purple with velvety black blotches. Remarkably robust habit. The large clusters rise gracefully above the beautiful foliage. The blooming plant with its enormous flowers makes a striking impression.

<b>Artemisia Silver King</b> A Plant of Rare Beauty for Landscape or Cutting For landscape effect from early summer until late winter, Artemisia Silver King is a most outstanding plant. For the cut flower trade the foliage of Artemisia Silver King is one of the greatest values as a filler for sprays or designs. It matures early in the summer and quickly hardens to a state when it can be cut and used without moisture. The foliage does not wilt or shatter after hardening off and can be carried dry indefinitely without losing its color. It thrives in ordinary soil, growing to a height of about three feet in almost perfect symmetrical form. The stems are well branched and thickly covered with bright silver colored foliage, but these quickly divide into a delicate lacy shape with the appearance of small flower buds all over the branches.....			<b>The Korean Chrysanthemum</b> <b>Chrysanthemum Coreanum</b> A remarkable new perennial of iron-clad hardiness from Korea, forming fine large clumps 2 to 3 feet in both diameter and height. The large white flowers have golden centers, resembling a glorified Oxeye Daisy, the petals often turning to a light claret pink. It blooms in the greatest profusion in early October to early December. Of easy culture, thriving in any good garden soil. We believe the Korean Chrysanthemum possesses exceptional possibilities for cutting; there is nothing quite like it for the late fall.....	Per 12	Per 100	Per 1000

**JOSEPHINE VESTAL (H. T.)**—A Rose of attractive coloring. Color is so difficult to describe that any description can only be a partial one, and gives but a faint idea of the superb beauty and richness of the shades. ## GOOD & REESE FAMOUS ASTERS

Our Asters are grown exclusively for us by John Bodger & Sons of California, who are undoubtedly the world's foremost growers of asters and zinnias. You are certain of receiving the finest seed obtainable.

### California, Sunshine Asters

The Sunshine type was introduced into this country a few years ago and became quite popular because of its dainty appearance. It was accepted by florists as very desirable, but met with one objection—the flowers were borne on too short and weak stems. After several years of hybridizing and special selection, we are now pleased to offer a strain which fills the special requirements of florists, and makes a better strain for general use. California Sunshine Asters retain their dainty appearance but are larger and are borne on long, stout stems, and the plant has the general appearance of being as robust as the Giant Washington or the upright branching types. The stems measure two to two and a half feet, while those of the earlier type measure about one and one half feet. We consider California Sunshine a distinct improvement on the original Sunshine. We offer the following colors: flesh, pink, carmine, lavender and violet.....
